TERMS AND CONDITIONS

LOCATION—3 miles north of Tallahassee, Florida, on Thomasville road.

SHIPPING POINT—Tallahassee, Florida.

TERMS OF PAYMENT—Cash with the order is required from unknown customers. If remittance is by Post Office Money Order, it should be made payable to us at Tallahassee, Florida.

C. O. D.—Shipments must be accompanied by 25% deposit as a guarantee acceptance. If you want us to mark any item for you, we require a deposit, usually 20%.

CHARGE ACCOUNTS—From unknown persons who have not had credit with us, we ask well-known references and time for investigating. All accounts due in 30 days unless other arrangements are made when order is filled.

SHIPMENTS—Please specify by what method you want your order shipped—Parcel Post, Motor Freight, Rail Freight, or Express—or we will use our own judgment.

RISKS OF SHIPMENTS—While we use every means at our command to secure prompt delivery, we are not liable for delays in transit; our responsibility ends upon delivery in good condition to transit companies.

However, we are here to please our customers and will at all times do all we can to help, should you make claim for any damages. If you have any reason to complain, or if there is any mistake in the order, please let us know at once so that we can rectify the mistake.

NOTICE—Prices are subject to change without notice and therefore this list cancels all previous quotations.

CAMELLIAS

The Loveliest Flower of the South

WHEN merchantmen and explorers were sailing the seven seas some two centuries ago, they brought home not only spices, silks and china, but many rare plants as well. Not the least of these was the lovely Camellia or "Japonica" as we call it, which, like many another plant treasure, came from China. For decades the Japonicas grew in Southern gardens, where they were held in great favor. Then they waned in popularity for a while, and were almost forgotten.

Camellias should be in every Southern garden, for here the soil and climate are ideal for them. In the North they have to be grown in glass-houses because of the severe winters.

ALBA PLENA

Camellias are easily grown, and their glossy foliage and colorful blooms are lovely to look upon. There is hardly a room in the house where a few of these richly colored flowers cannot be used.

Camellias are the aristocrats of southern flowering shrubs or small trees. Once established, they withstand extremes of drought and cold. Apart from the lovely blooms in a wide range of colors and forms, they are choice ornamentals, whether used as specimens or with azaleas or other plants.

The Camellias we offer this year are some of the finest we have ever grown. Many varieties are in very limited supply, due to the ever-increasing demand for the better kinds, and we urge ordering early, for immediate or later delivery.

PLANTING INSTRUCTIONS—Camellias grow in almost any soil, but well-drained good garden soil a little acid in reaction is more suitable. A half-shady location is preferable, especially when plants are young, but free blooming cannot be expected in a place entirely shaded. The root system of the Camellia is rather coarse and not quite so easily transplanted as the azalea.

The Camellia is a gross feeder and responds well to fertilization. At the time of planting, if the soil is not fertile enough, use a mixture of one-half good soil, one-fourth well-rotted cow manure, and some peat or leaf mold. In early spring apply well-rotted cow manure or some commercial fertilizer with a high percentage of nitrogen.

The Camellia loves a humid atmosphere, so do not neglect watering. Frequent spraying of the leaves when the temperature is not above 80 degrees helps a great deal during the dry summer months.

SPRAYING—Red spider and various scales may attack Camellias. We have been using Nursery Volck at the ratio of 1 to 60 in summer and 1 to 25 in winter, mixing one teaspoonful of Black-Leaf 40 to every gallon of solution. Thorough spraying twice a year controls these pests satisfactorily. Avoid spraying in the strong sun in summer and in freezing winter temperatures, as that may cause the leaves to burn.

PINK PERFECTION

VICTOR EMANUEL

Rare Camellias

GROUP I

ADOLPH AUDUSSON. Semi-double, large red flower, with creamy white variegation. Very choice. Grafts. 8-12 in. to 18-24 in.

AITONIA. Large, semi-double, rose-pink. Stamens and petaloids mixed in center. Grafts. 8-12 in.

AUNT JETTY. A famous variety from Tallahassee, Florida. A large peony-type, oriental-red flower, with an occasional white spot. Not to be mistaken for Governor Mouton. Midseason. 6-8 in. to 3-4 ft.

DAIKAGURA VARIEGATED. Flower double peony form, very large, deep rose in color with white spots. 12-18 in.

DONKELAARI. One of the finest of all semi-double Camellias. Very large, red flower, with an occasional white spot. Grafts. 8-12 in. to 18-24 in.

DUCHESS OF SUTHERLAND. Very large, semi-double white flower with an occasional pink stripe. Grafts. 8-12 in. to 18 to 24 in.

FINLANDIA. Large, open-flowered white with prominent stamens. Grafts. 8-12 in.

FLAME. Large, semi-double, deep vivid red. We think this one of the loveliest Camellias on the market today. Grafts. 12 in. to 18-24 in.

IL TRAMONTO. Very large, full double, light rose-pink blotched with white. Narrow pointed foliage. Own root, 12-18 in., \$5.00; 18-24 in., \$8.00.

IMURA. Large, pure white, semi-double; long narrow petals. Often 5 to 6 in. in diameter. 12-18 in. to 24-30 in.

LADY MARY CROMARTIE. Large, semi-double, deep rose-pink, stamens intermixed in petals. Grafts. 12-18 in.

RARE CAMELLIAS, GROUP I, continued

LADY VANSITTART, VARIEGATED. Large, semi-double, white, striped with pink. Very choice. Limited supply. Grafts. 18-24 in.

MAGNOLIÆFLORA. Medium to large, beautiful pink with conspicuous stamens. Should be in every collection. Grafts, 8-yr. stock. 12-18 in.

MARTHA BRICE. A new Camellia. Large, semi-double, light pink. A seedling from Quitman, Ga., and the most admired Camellia we know. Grafts. 12-18 in.

MRS. CHAS. COBB. Large, semi-double, dark (almost black) red, golden stamens intermixed with petals. Grafts. 12-18 in.

QUEEN BESSIE. Semi-double, clear white with faint flushes around center, presenting a very soft and delicate appearance. Grafts. 12-18 in.

ROSE DAWN. A very beautiful double pink Camellia of large size. Vigorous grower. Grafts. 8-12 in. and 12-18 in.

SMILING BEAUTY. Semi-double, of a most pleasing and distinctive delicate pink which is slightly deeper in color than Magnoliæflora. 12-18 in.

SNOWDRIFT. Hardest of the white Camellias. Large, semi-double, pure white. Grafts. 12-18 in. and 18-24 in.

VICTOR EMANUEL. The finest Camellia that we know. Very large peony flower, deep velvety red. Own roots. 6-8 in. to 3-4 ft.

MATHOTIANA RUBRA

COLONEL FIREY

RARE CAMELLIAS, GROUP I, continued

NO. 14 B. Large, semi-double, pure white with incurving petals. Stamens intermixed with petaloids and often very fragrant. Grafts. 8-12 in. and 12-18 in.

NO. 257. Very large, semi-double, dark red. Midseason. Grafts. 8-12 in. and 12-18 in.

Standard Camellias

GROUP I

ABUNDANCE. Double, pure white, medium-sized flower showing a few stamens intermixed with the petals. Very fine. 8-10 in. to 20-24 in.

ALBA PLENA. Very famous variety, yet very scarce. Flower is full double, pure white. One of the best whites, but tender. 15-20 in. to 30-36 in.

AREJISHI. Carnation-type flower of dark red. Blooms in September and October. 20-24 in.

CANDIDISSIMA. One of the loveliest of the whites. It is perfectly imbricated. Blooms late. 24-30 in. to 3-4 ft.

ELATA. Very large, semi-double flower, deep rose to carmine color. Semi-peony type. 15-20 in.

ELENA NOBILE. Double, red flowers. 8-10 in. to 4-5 ft.

ELEANOR FRANCHETTI. Very large, double peony form. White with occasional pink marking. 20-24 in.

GLOIRE DE NANTES. Large, semi-double flower with firm-textured petals of deep rose-red. The center petals are often twisted and interspersed with long yellow stamens. 24-30 in. and 3-4 ft.

HERMES. Very large, loose peony-form flower of elegant shape, with faint scent. Pink and red variegated, with white margin. 8-10 in. to 4-5 ft.

JARVIS RED. Deep blood-red, semi-double flowers with golden yellow stamens. 8-10 in. to 8-10 ft. (Write for prices on 8-10 ft. plants.)

MONARCH (Honor of America; Gunelli). Peony form, deep pink with white dots. 10-15 in. to 24-30 in.; 30-36 in. heavy; 3-4 ft. heavy.

OTOME. Full double, light pink. Somewhat similar to Pink Perfection but deeper pink and larger flowers. 8-10 in. to 24-30 in.

PANACHE. Medium large flower of blended shell-pink and white. 20-24 in.

PINK PERFECTION. All that the name implies. Small, double flowers of shell-pink color. Starts flowering early and continues throughout season. 8-10 in. to 3-4 ft.

PROF. C. S. SARGENT. One of the really great Camellias. Large; double peony form with high pincushion center; solid crimson color. 15-20 in. and 24-30 in. (Write for prices on 5-6 ft. to 8-10-ft. plants.)

RAINY SUN. Semi-double; deep rose to rose-red. Large, loose petals. 20-24 in. and 24-30 in.

SEMI-DOUBLE BLUSH. Hardest of light pink Camellias. Almost single; blush-white. Fast grower and heavy bloomer. 8-10 in. to 3-4 ft.

STARDUST. Dark pink flowers of medium size, resembling Chandleri in form. 24-30 in.

T. K. VARIEGATED. Semi-double; pale pink with shadings of deeper pink and lavender; large cluster of yellow stamens. 15-20 in. to 20-24 in.

INDIAN AZALEAS

(*Azalea indica*)

The Indian Azaleas are evergreen shrubs with large single or double flowers which sometimes measure 4 inches across. Some varieties are slow-growing, and practically dwarf, while others grow rapidly into large shrubs. The colors are varied and very beautiful.

RED AND DEEP PINK

PRIDE OF DORKING. Late. A good grower, open and hardy; free flowering.

PRINCE OF WALES. Rather late. Hardy, bushy, compact grower; free flowering.

LIGHT PINK

ELEGANS. Early. A hardy, fast grower, of rather open habit; free flowering and easy to grow.

ELEGANS SUPERBA (Pride of Mobile). Midseason. The flowers are larger and deeper, brighter pink than Elegans.

GEORGE FRANC. Early. A hardy, bushy grower, bearing its large flowers in profusion.

SALMON

DIXIE. Midseason. A strong-growing, hardy, bushy type. Flowers salmon-red.

DUC DE ROHAN. Early. A semi-hardy, bushy, compact grower; very free flowering. Blooms of medium size.

LAWSAL. Midseason. Very hardy; blooms profusely. One of the best in its color.

WHITE

FIELDER'S WHITE. Early. Large, pure white flowers. Hardy, strong, upright grower; free blooming. Best foliage of the whites.

INDICA ALBA. Blooms later than Fielder's White. Pure white, and very hardy.

LANTANA ALBA. Late. Good-sized, pure white flowers. Hardy, dwarf, bushy grower.

CULTURAL DIRECTIONS *for* AZALEAS

AZALEAS of any variety are easily grown if a few cultural suggestions are followed. Soil with an acid reaction is necessary to the growth of Azaleas. If your ground has an alkaline reaction, add plenty of leaf-mold or peat moss to it before setting out the plants. Keep lime away from them. Sufficient moisture to keep the roots moist is necessary, but the location chosen should be well drained. Avoid dense shade; best results are obtained by planting Azaleas in partial shade. They do not require much commercial fertilizer if plenty of leaf-mold or peat moss has been supplied at the time of planting. A light application of cow manure or cottonseed meal is desirable.

Note: For lining-out Azaleas, we suggest that you wait for spring delivery, when danger of frost is over. We book advance orders on lining-out stock.

INDIAN AZALEAS, continued

LAVENDER

FORMOSA. Midseason. A robust, strong-growing Azalea with good foliage and very large flowers of lavender-lilac. Hardy, and one of the easiest to grow.

VARIEGATED

OMURASAKI VARIEGATA. Our finest variegated Azalea. Blush-pink with markings of deeper pink.

VITTATA FORTUNEI. A hardy, tall, open grower; free blooming. Medium-sized, lavender and white flowers.

ORANGE

COCCINEA MAJOR. Midseason. Semi-hardy, open growth, with good foliage. Blooms of medium size.

PRESIDENT CLAY. Early. Tall, open grower; free flowering. Medium-sized flowers. Very hardy.

PRINCE OF ORANGE. Midseason. Compact grower. The good-sized flowers are well mixed with the luxuriant foliage. Semi-hardy.

KURUME AZALEAS

The Kurume Azaleas, of more recent introduction than the Indica varieties, are equally attractive. They are hardier and dwarfer in growth, and very popular for forcing.

RED AND DEEP PINK

CHRISTMAS CHEER. Midseason. Free producer of hose-in-hose type flowers of a good Christmas red color. Compact; deep green foliage. Hardy.

HINODEGIRI. This is one of the most brilliant of all the dwarf Azaleas, and is a profuse bloomer over a long period. It is a shapely plant, with round, evergreen foliage, and quite dwarf in growth, making a fine pot-plant or an ideal low hedge. The flowers are vivid rosy scarlet.

SUNSTAR. Single, medium-sized blooms produced for a long period.

LIGHT PINK

CHERRY BLOSSOM. Very light pink, hose-in-hose flowers. A tall grower, somewhat late in flowering. 6-8 in.

CORAL BELLS. Dainty, shell-pink hose-in-hose flowers produced in profusion.

PEACHBLOW. One of the fastest-growing Kurumes. Medium-sized single flowers of a delicate peach shade.

AZALEA, CORAL BELLS

PINK PEARL. Light pink flowers produced in dense clusters. Tall; midseason.

SALMON BEAUTY. Large, hose-in-hose, salmon-pink flowers and light green foliage.

WHITE

SNOW. Good-sized, hose-in-hose flowers of pure white among beautiful glossy leaves.
